Jira Software

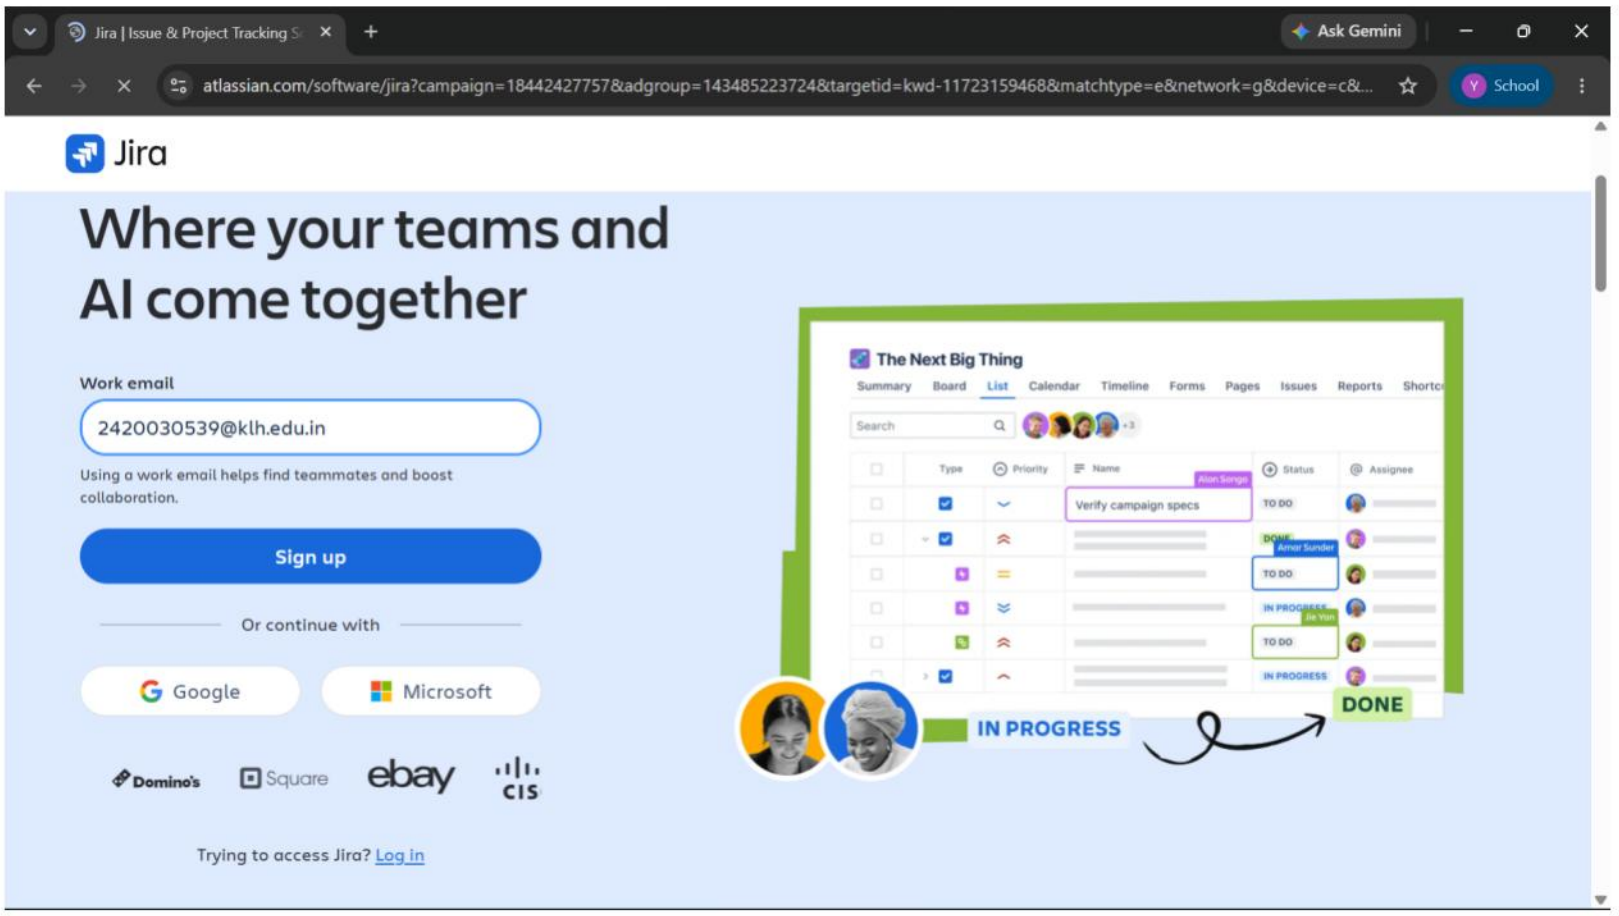

1. Open a web browser.

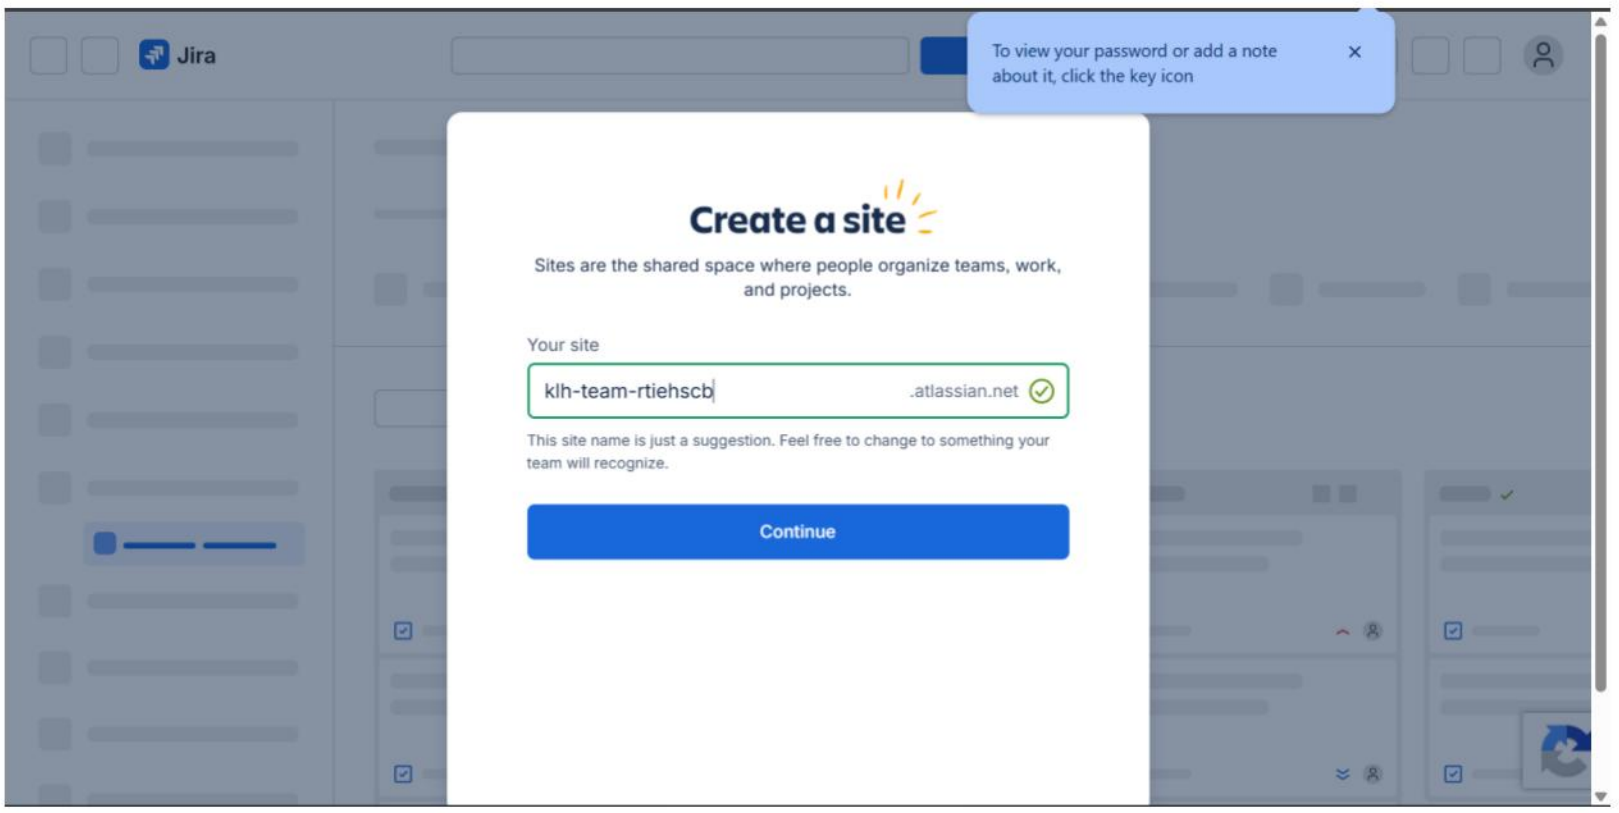

2. Search**Jira Software**.

3. Click on **Jira Atlassian**.

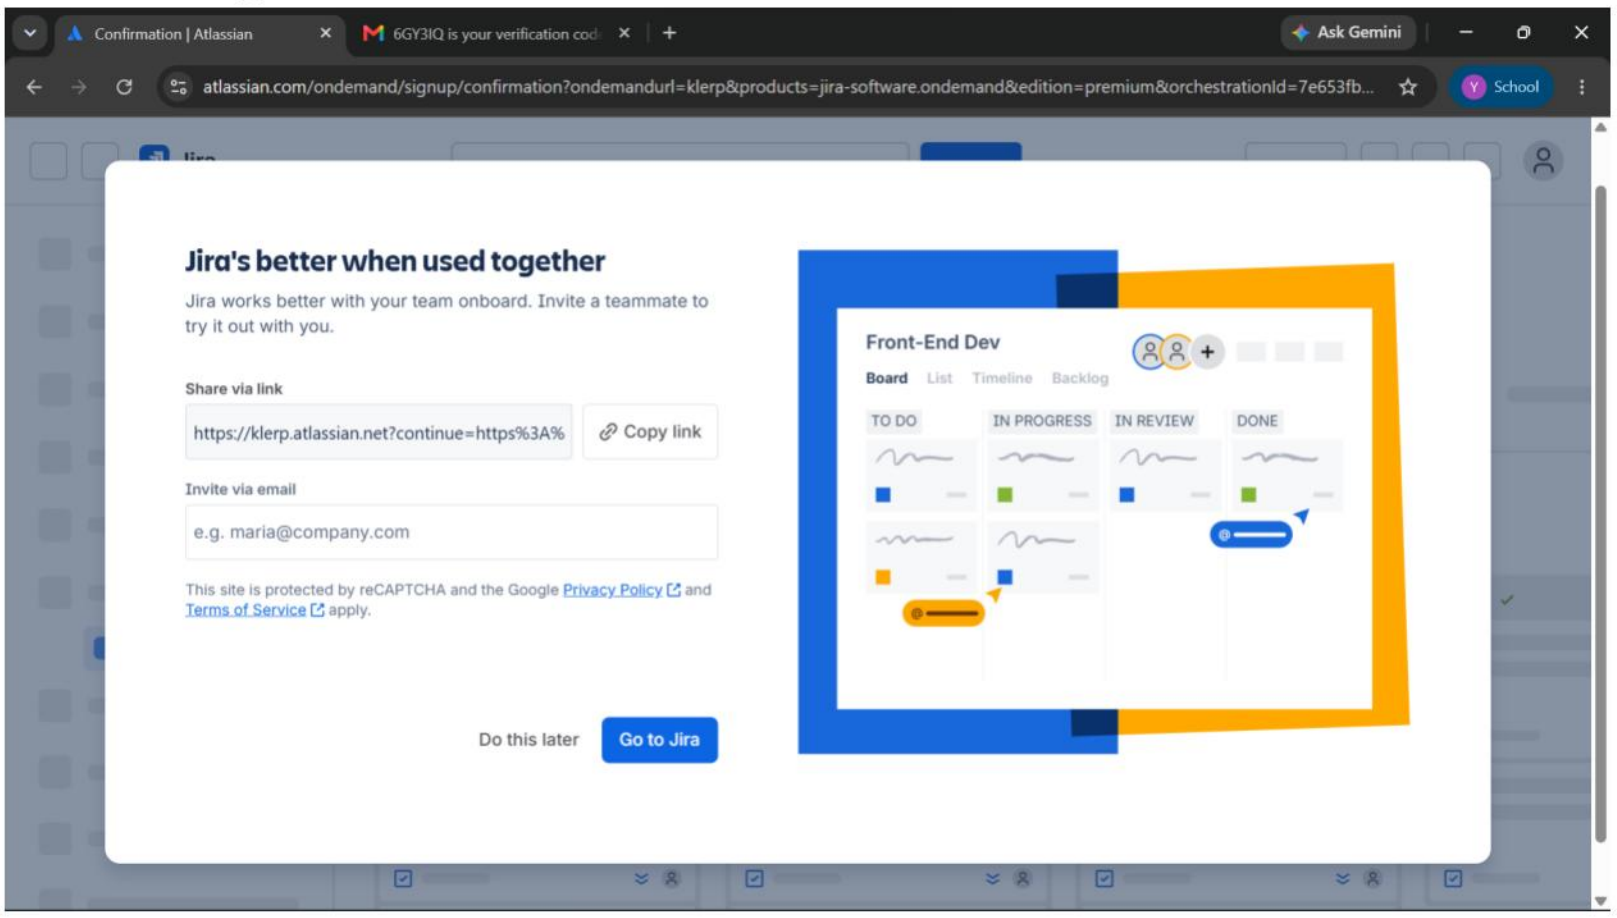

4. Sign up or log in using your Atlassian account.
5. Create a **Software Project**.

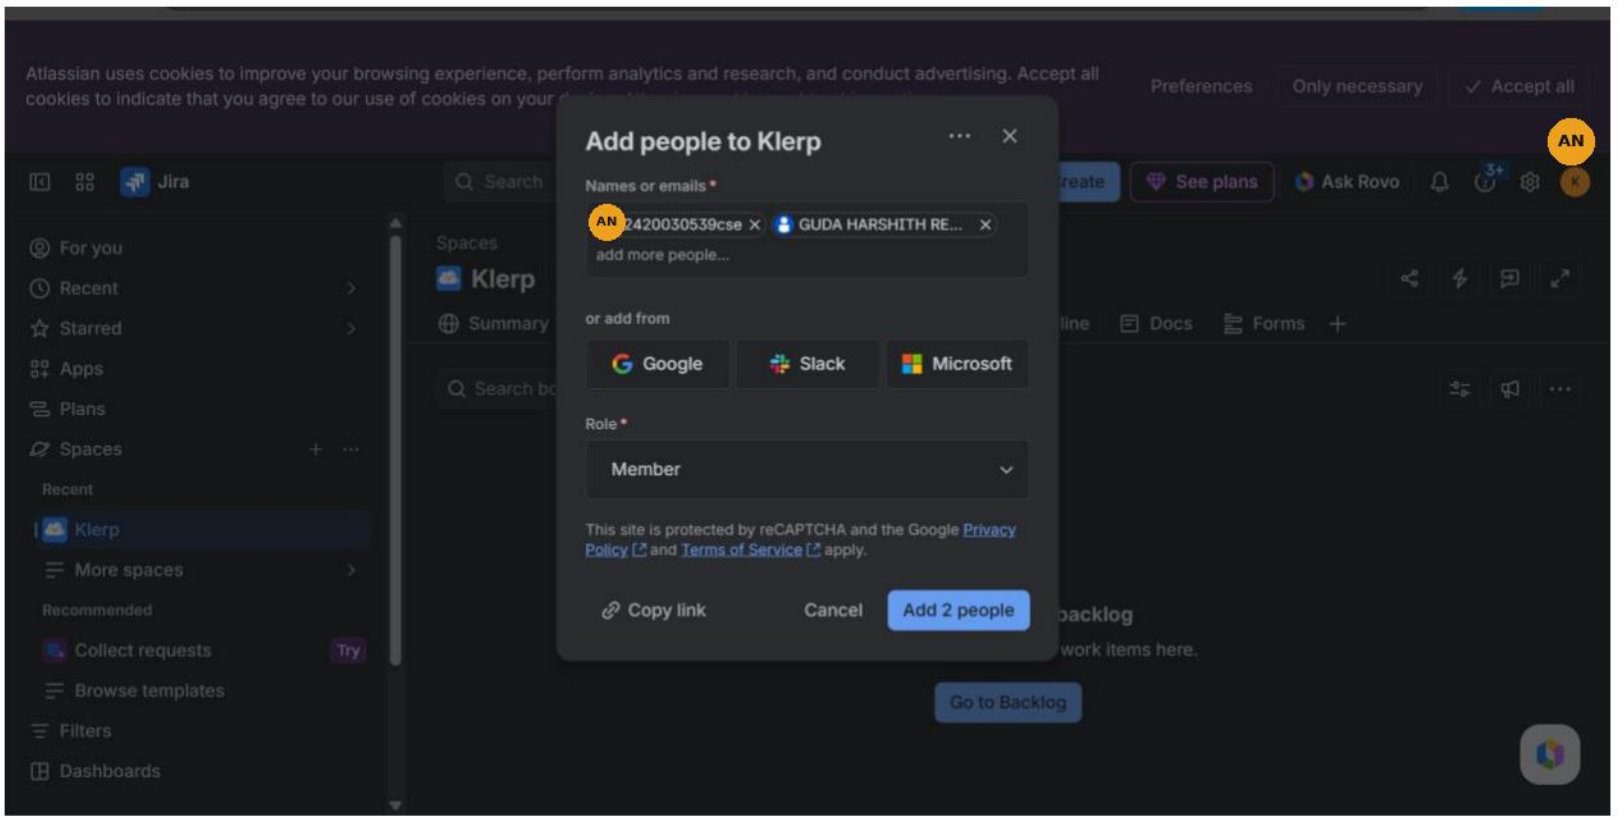

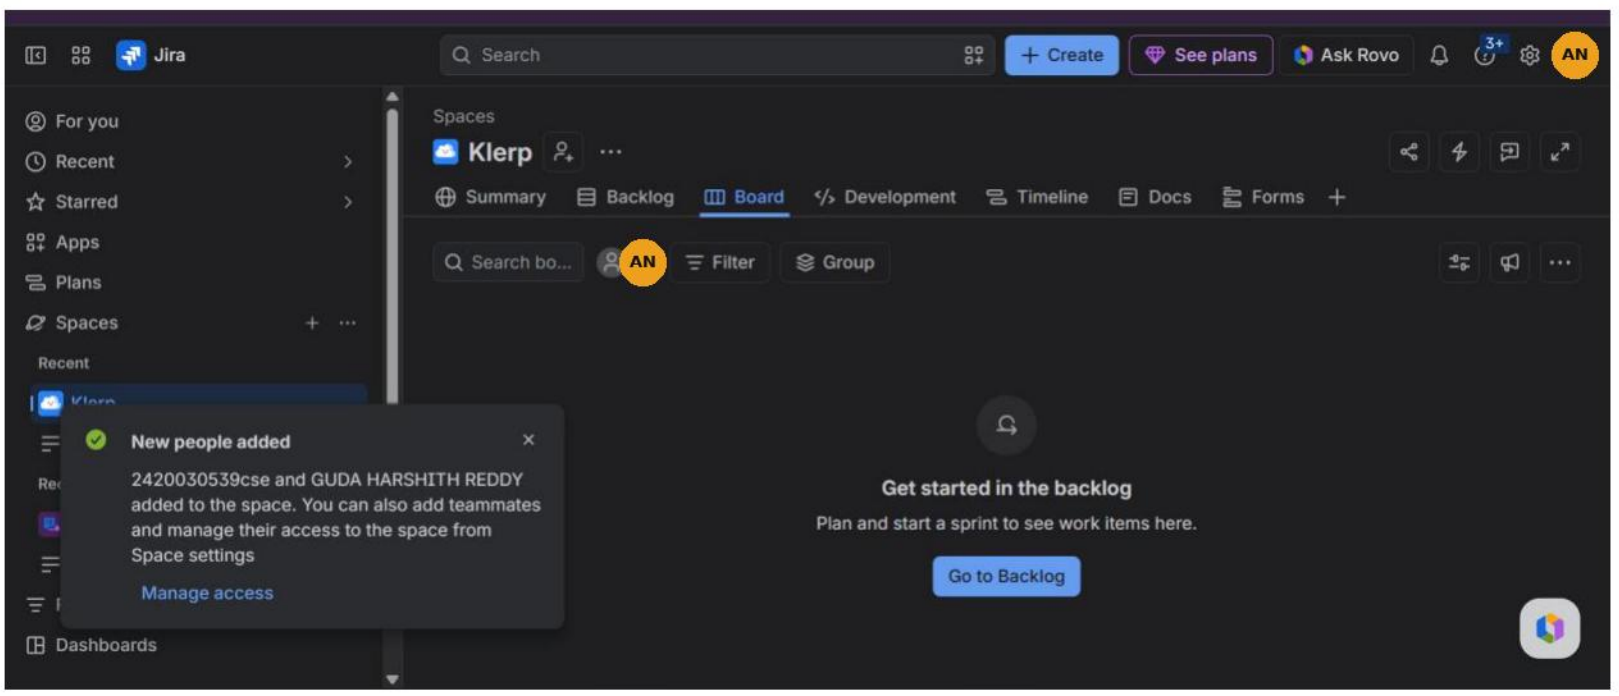

6. Select the **Scrum** project template.

7. Enter the project name and create the project.
8. Create **Epics** for major modules.
9. Create **User Stories** under each Epic.
10. Add all user stories to the **Product Backlog**.
11. Create a **Sprint**.
12. Move backlog items to the sprint.
13. Assign tasks to team members.

14. Set the priority for each task.
15. Start the sprint.

16. Update task status (**To Do → In Progress → Done**).
17. Track progress using the Scrum Board.
18. View sprint reports and burndown chart.
19. Complete the sprint after finishing all tasks.

Outcome

Successfully learned how to use Jira Software for project planning, sprint management, task assignment, and progress tracking.
